

American Restoration partners with American Restoration Water & Fire

Indianapolis, IN, January 1, 2021 – American Restoration is pleased to announce its strategic partnership with New Mexico based [American Restoration Water & Fire](#) (“ARW&F”), a restoration industry leader in the Southwest for the past decade.

Headquartered in Albuquerque, New Mexico, ARW&F serves all of Central and Southern New Mexico as well as El Paso, Texas. ARW&F, co-founded in 2011 by Jenny and Mark Valencia, is a full service restoration provider with expertise in emergency water and fire mitigation, mold remediation, cleaning, repair and rebuild as well as other services for both commercial and residential customers.

“We look forward to continuing to grow our customers, team and culture with the support of additional investment and best-practice sharing through American Restoration,” said Jenny and Mark Valencia.

American Restoration Water & Fire is the fourth partnership for American Restoration, which acquired [Utah Disaster Kleenup](#) in May of 2019, [Cavalry Construction and Restoration](#) in February of 2020 and [A&J Property Restoration](#) in September of 2020. Through the partnerships, American Restoration provides the teams with the necessary tools, resources and capital needed to exceed customer expectations and accelerate growth of the business in existing and high potential markets. “American Restoration Water & Fire is a great partner based on their strong leadership team, customer service and track record of growth. We are excited to continue to build our business and geographic footprint with quality companies like ARW&F” said American Restoration CEO, John Joseph.

About American Restoration: American Restoration provides comprehensive water, fire, mold, and other property mitigation and restoration services to U.S. commercial, industrial, multifamily and residential customers. Its mission is to restore our customers’ homes and businesses through high-quality service to rapidly help rebuild their lives and businesses after a disaster.
